To whom it may concern,

Re: Letter of support for Amitava Sengupta

I am very pleased to be able to support Dr Amitava's application for honorary fellowship programme. I have known him for a number of years and he has always struck me as a person of high calibre with a genuine combination of academic, clinical and research skills which has helped him in developing new and innovative programmes for children needing development and supportive care programmes for children in India. Despite being a professional hard worker, his desire for further honours remains undiminished and I am confident he will continue to make major contributions to child health care in India.

I strongly support his application for inclusion in fellowship programme and no doubt he will have a strong support from other colleagues.

I wish him all the best in future

Professor S Sinha
